Name your "top 3 concerns" regarding building or room-level attributes/factors affecting IAQ & IEQ in NJ schools?

63 responses

Name your "top 3" behaviors affecting IAQ & IEQ (noise, light, ventilation w/ filtration, thermal comfort) in NJ schools?

54 responses

What are two important visible or invisible/potential sources of carbon dioxide or CO2 in NJ schools?

25 responses

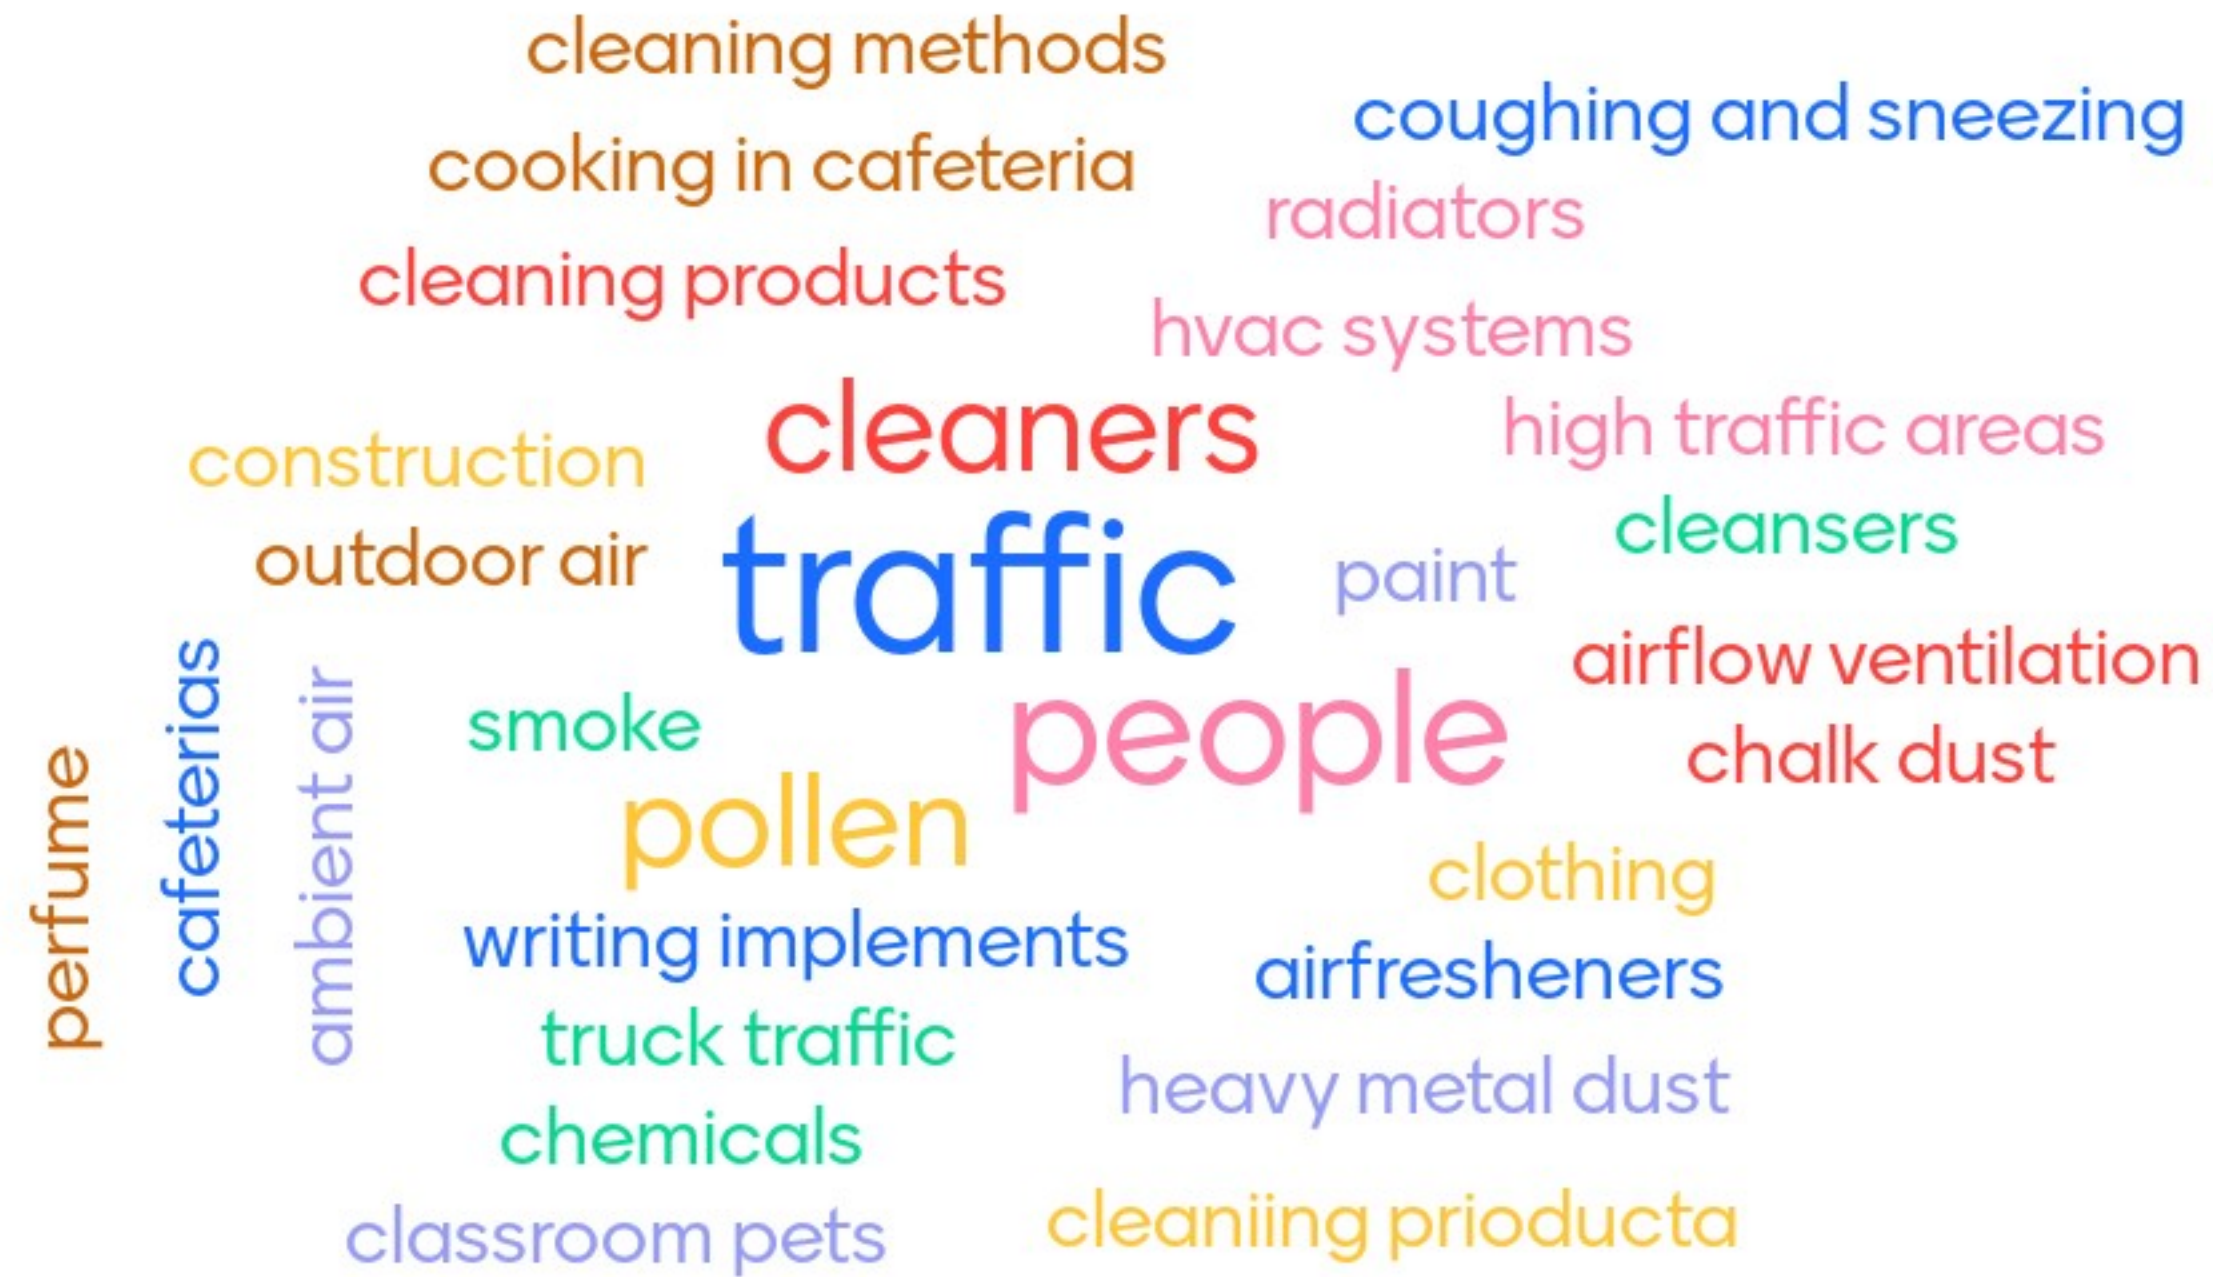

What are your "top 3" behaviors affecting IEQ (only noise and light) in NJ schools?

28 responses

Name your "top 3" sources of airborne particulate matter (particles, dust, aerosols) in NJ school classrooms? Please exclude science labs, CTE shops.

36 responses

Where have you observed visible mold in NJ schools? [Note: 1+ species/colors...]

27 responses

Where have you observed water damage in NJ schools? [Note: mold/mildew/fungi & bacteria = sources of food + of moisture]

29 responses

Where do you observed consumer products with various aerosol and/or gas-phase volatile & semi-volatile organic chemicals (VOCs & SVOCs) in NJ schools?

0 responses

Slide 10: We completed slide #1-9; slides #11-end only used briefly to point out other sources of chemicals inside & outside (if use w/proper notice).

Where have you observed/experienced chemical pesticides use indoors (and in nearby/adjacent outdoor locations) at NJ schools?!

At school, in classrooms	At school inside the building, besides classrooms	At school playgrounds, on/near equipment on treated wood	At school public parks and gardens, i.e., open to public after hours	At school, other places outside the building	For community vector control programs (insect, mosquito)	None	I do not know/I do not want to answer this question.
--------------------------	---------------------------------------------------	----------------------------------------------------------	----------------------------------------------------------------------	----------------------------------------------	----------------------------------------------------------	------	------------------------------------------------------

Where have you observed consumer products with brominated flame retardants (poly-/per-fluorinated chemicals), or believe are present, in NJ schools?

0 responses

What are two potential pathways of radon or Rn (a tasteless, odorless radiological gas) into/inside a typical NJ home or school building?

0 responses
